2018 is a special year for us at Equus as it is our 10th year of doing business in the Equine Feed industry. This is a great achievement and we are very proud of our brand. From beginning as new kids on the block, Equus has grown and developed into a well trusted, reliable, quality brand.

In 2008, Equus began with just a few products available only in the Limpopo and Gauteng regions. With a committed team of expert nutritionists and a highly motivated staff continually striving for excellence, the Equus range has expanded over the years to accommodate a wide variety of needs and is now available nationwide.

At Equus, we pride ourselves on using only the very best raw materials which enables us to produce horse feed more natural, more wholesome and more environmentally friendly than the market standard. Equus feeds is also a registered AFMA (Animal FeedManufacturers Association) member and complies with its strict code of conduct in all aspects of manufacturing.

During 2014, Equus implemented the use of Near-Infrared Spectroscopy to analyse raw materials in processed products as well as in finished products. This facilitates stringent controls of incoming raw materials and ingredients to maximise quality and to assist in achieving a strict consistency in all finished products. This standard of selection has enabled us to grow exponentially over the years and is our hallmark.

Ten years of continued growth and improvement have allowed us to produce a range of products that are truly unique to the South African market. Focus on gut health has always been paramount and the latest research together with proven methods of manufacture have been combined to achieve this. We take this opportunity to thank our loyal clients, retailers and suppliers. Without you, this would not be possible. Rest assured that Equus continues to strive for excellence.

We look forward to more growth and dealing with the challenges of the next decade.
